COMPLIANCE FIELD REPORT

INSPECTION DATE: 11/25/91
REPORTING DATE: 11/26/91
INSPECTOR: Raymond Audette

CASE NAME AND SERIAL NO.: Aggra-Granulite - - UT058-90-6N
LEGAL DESCRIPTION: T. 25 S., R. 4 W., Sec. 34, SW 1/4
APPLICATION TYPE: Quarry
COMMODITY DESCRIPTION: Rhyolitic Tuff
TOTAL ACREAGE: 2.6 acres
RESOURCE AREA: Richfield, Sevier River
DATE OF PREVIOUS INSPECTION: 9/13/90
CUBIC YARDS PERMITTED FOR REMOVAL SINCE LAST INSPECTION: None

ACTIVITY SINCE LAST INSPECTION: None, general clean up, claim maintenance, trenching.

CALCULATED VOLUME REMOVED (Show calculation): Approximately 15000 cubic ~~yds.~~ ^{FT (P.A.)}
(calculated) of ore material removed as of 9/13/90. Specific data is unavailable concerning production data for 1991.

STIPULATION VIOLATIONS (Reference Stipulations by Number): None

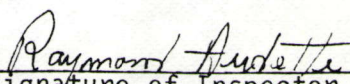

NARRATIVE REPORT

Re: The Aggra-Granulite quarry at T. 25 S., R. 4 W., Sec. 30, SW 1/4.
The attached photos were not available for the narrative compliance inspection report and are now made a part off the case file UT-058-90-6N.

An on-site inspection this date indicates that all quarry operations have been suspended. The specific date of suspension is unknown but presumably before August, 1991.

All heavy equipment noted at the last inspection has been removed. Specifically, the generator, truck, ore crusher, front end loader, dozer, and conveyor belt have been demobilized. As per the BLM letter dated 13 Sept. 1990 to Aggra-Insulite, the company has satisfactorily removed all debris and trash from the site. All stockpiles noted in 1990 have been removed.

An examination of the assessment permit affidavit for the year ending 31 August 1991, reveals improvements totaling thirty four 8-hour shifts totaling \$4400. The affidavit stipulated that assessment work consisted of claim maintenance, hauling of stockpiles, and trenching. This inspection could not find any evidence of trenching.
